'Dividend Tracker Korea' Task Order

July. 15. 2020 Researcher of II, Choi, Minki

1. Preface

Bank of Korea cuts its benchmark interest rate to 0.75 percent.

Under these circumstances, dividend stocks are drawing attention, and they can be a substitute for deposits and installment savings.

However, Korea lacks information platforms to invest in dividend stocks.

Therefore, I would like to request the following platforms to be useful in making investments in dividend shares.

2. Application Production Request

- 1) Application name: Dividend Tracker Korea
- 2) Making purpose

To help Koreans predict future dividend price according to current dividend price.

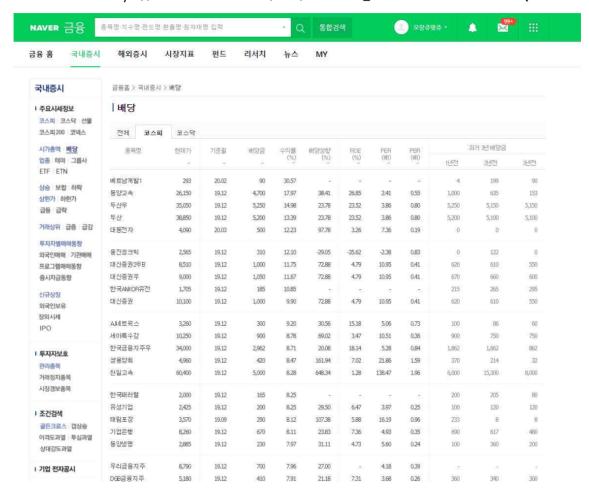

3) Application Identity(Symbol)

- 4) Direction
 - Collect data by KOSPI and KOSDAQ seperately after accessing Naver Finance > Domestic Stock Market> Dividend. ROE, PER, PBR data is not required.

2 Make several tables displaying data for each company, with broken line graph of current 3 years' data like below.

종목명	현재가	기준월	배당금	수익률(%)	배당성향(%)	과거 3년 배당금			과거 3년 배당금 차트(꺾은선)
						1년전	2년전	3년전	과사 3한 배상을 사무(묶는한)
베트남개발1	293	20,02	90	30.57	198	- 4	199	90	
동양고속	26,150	19.12	4,700	17.97	38,41	1,000	635	153	
두산우	35,050	19.12	5,250	14.98	23.78	5,250	5,150	5,150	
두산	38,850	19.12	5,200	13.39	23.78	5,200	5,100	5,100	

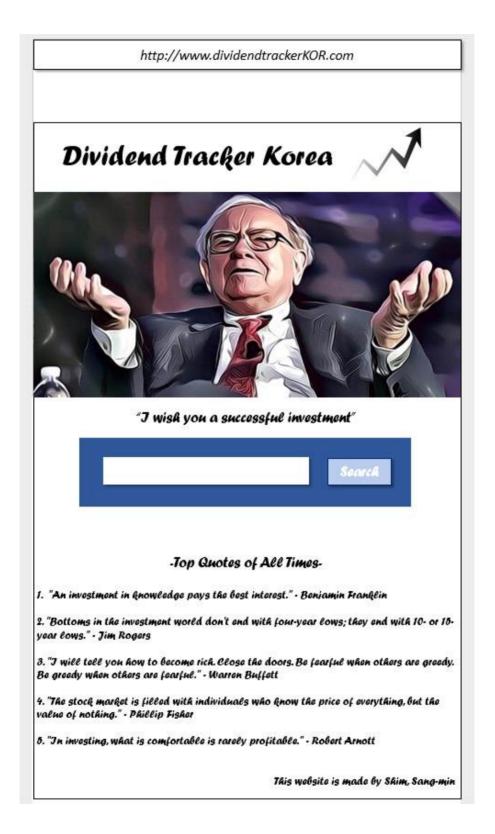

3 Make 'Search Box' like below.

4 Make HTML type website background by typing code

⑤ Design a Website and Application like below

6 Make search result like this when searching for a company
